Grown by
A. T. REMER
AULNE, KANSAS

AULNE TREES

The kinds that have been tried out and have made good

AULNE TREES exclusively our own growing bred from bearing orchards of the best strains obtainable and under our long summer suns and handled by men who have had a life time experience in growing trees. We send our customers nothing but trees which we have grown nothing but the Red Star Brand when our growing is exhausted we stop selling.

Red Star Wintering Out Of Doors.

We winter out of doors in the open, out in the fields, every tree is freshly dug, and when you consider the fact that last year it went to 6.4 below zero at Winchester, you can realize that, no where can you buy trees subjected to such a range of temperature and so well hardened to stand rough climates.

A MESSAGE

Many new trees, plants and seeds are grossly misrepresented by a few dealers who trade on the reputation of reliable firms, often doing a thriving business by selling trees and plants where they very well know they cannot thrive; this and the substitution of inferior or wholly worthless trees or plants under the name and reputation of good ones has been, and is now being carried on persistently and systematically by several parties who victimize those who deal with them by trading on the reputations of reliable firms and good trees.

An especially cruel form of this is the persistent pushing of the Spineless Cactus, Crimson Winter Rhubarb and other tender plants for cold climates, which cannot live where the ground freezes an inch in depth.

It should be the duty and privilege of every good citizen to aid in exposing and routing all who are obtaining money under these false pretenses.

Having been in business almost forty years, millions of trees and plants raised in my establishment are now bearing fruit not only in the western United States, but everywhere on earth where the sun shines and trees will grow. Does this forty years record of just dealing mean anything, and is it surprising that such a reputation should be worth trading on? Counterfeit coins are not counterfeited—it is the genuine ones that are misrepresented.

In putting out this little book we only name a few of the things we handle. We have a good line of stock and can take care of all orders large or small and will cheerfully answer all questions that we can and will treat all square. We are human and may make mistakes, but will gladly rectify all when brought to our notice. I would like to have all needing trees and plants to send their list to me for estimate. I know I can save them money.

ROSES

Roses are my delight,---I grow the flower for my friends and give them gladly to sick and well. For our best of friends it takes the rose and the beauty of them to say what we want to have our best friends believe. The rose is always Pure and the thorns forgotten when we give them.

The Mother Barden collection of Roses 12 in number none better. She was a friend all the time, and this collection is for roses all the time. Try them.

The writer has a memory ever sweet and clear, one good old woman Mother Barden, a lover of the beautiful and a blessing to all who knew her. Some way we cannot help but associate her with the rose.

The Keeper Apple Still on Top for the Southwest. Do not forget trial after trial has said so.

AN APPLE A DAY KEEPS THE DOCTOR AWAY

But did you have this apple? Did your children have it? Did your neighbor have it? Why not?

In the past twelve months the cost of living has scaled fifteen per cent higher,--they tell us that it will go on increasing. Meantime, the world's available wheat area is shrinking, from unavoidable causes; settlers are driving the great herds of beef cattle from the ranges

But the world must be fed. How can these food deficits be met and balanced? By the use of more fruit, by the placing of fruit daily in the mouths of the millions. If you believe that fruit is today accessible to these millions, as are still bread and meat, ask every man you meet, "Have you eaten an apple today?" and tabulate the answers.

"GIVE US MORE FRUIT"

Cry not alone the cities but the villages, the farms, the bulk of men and women and children who rise up every day to be fed and to go about their work.

YOURS IS THE OPPORTUNITY

APPLE---One and Two Year

“You get a wonderful growth on your apple, something we have never seen before”
—Michigan,

Listed in Order of Ripening

Yellow Transparent--Tender, waxy, sub-acid
—profitable

Larkin's Sweet June—A new apple, one free with every \$5.00 order, for testing

Early Harvest—We have one of the best strains in Kansas.

Red June—The Everbearing strain, large beautiful red fruit

Red Astrachas--Medium, yellow covered with red, hardy, Market.

Benoni--Striped red, fine desert, good filler.

Duchess (Oldenburg)—Large, acid, good cooker, best market apple of its season.

Maiden's Blush—Pale yellow, crimson cheek profitable---its dried product in great demand, on account its whiteness,

Summer Queen—Large, sub-acid, valuable.

We send you 20 of these apple trees mail postpaid for \$1.00

Wealthy--. Double starred across continents as keeper, filler. and for profit. Hardy

McIntosh Red—Personally, I can not say too much by way of my good opinion of this apple, and I am anxious to see it given a thorough try-out in this section. It is the great hardy apple of the Bitter Root.

country, and on account of its bright color and flavor that melts like a snowflake, it is very profitable where it can be successfully fruited. If you have it in bearing, let us know what you think of. If you have not tried it, include a few trees with your order. Worth trying at any rate.

Grimes Golden—Some one has said that the man who originated this apple conferred a benefit upon humanity. It is the most widely grown and successfully of all the yellow apples and there is in it more to tempt the appetite and benefit the health than all the hospitals in the land

Jonathan---The King of red apples, commanding the best prices of the season. A good tree and an apple that has crowded the old eastern sorts up against the wall.

Gano.-For all practical purposes, identical with Black Ben Davis and Reagan, a very handsome, apple, profitable and especially worth considering where storage facilities are limited or crude.

Winter Banana---Beautiful but tender--I can hardly say for it that it has come up to the expectations of its friends

Rome Beauty---This apple is showy, handsome one of the best cookers, has made a name for itself and is in established demand.

Winesap---“And the greatest of these” is the Winesap, I like it first of all because it is a Southern apple and because to our way of thinking the Cumberland and Blue Ridge mountain strains surpass in color and quality anything else that we have ever seen from any part of the country. More Winesaps are in fruiting and it has the widest area of adaptation of any apple on the list---unless you are too far north it is the apple on which to pin your faith. We have been buying our scions from the famous Craig Orchard, one of most profitable and perfectly kept in Virginia.

Wetzel's Delicious---We propagate from the Wetzel strain of this famous apple, and we like to grow it because there is a vigor and upstanding about the trees in the row that is distinctive and if you have ever seen it once, you will always know it. It makes the upper grades for us and we like it as a nursery tree.

York Imperial---One of the trio, (with Albemarle Pippin and Winesap) that has made Virginia famous as an apple country, We have heard of one man who years ago exchanged a horse for a thousand York Imperial apple trees and from the orchard therefrom he was able to draw a comfortable living and educate a large family of children. Our Yorks are also grown from the Ailes strain.

Ben Davis---Much derided by some people but we think it a great apple in many respects.

Mammoth Black Twig---A large, showy, red apple, good property, South and west.

Stayman's Winesap---I want to tell you something about Staymans. It is my business to grow the tree and possible presumption for me to set up my opinion against that of successful fruiterers. Dr. Staymans, its originator, said 'The time will come when all will want it' and that time seems to have come.

Arkansas Black--A Late bloomer and sure but scanty bearer. Good fruit. Sort of loafer on the job.

Jeniton---In about the same class.

Spitzenburg---One of the richest apples grown and one of the most beautiful. Red.

PEARS—One and Two Years

Early Harvest---A delicious, yellow pear.

Koonce---Very juicy, sweet and of good quality, hardy and a sure cropper, best of the early kinds.

Wilder's Early---Not much for looks, but a dandy good pear for eating and also for profits.

Bartlett---Most profitable of pears for canning and shipping. great money maker

West, but blights in South, Rich golden yellow, with delightful musky flavor.

Seckel---The standard of excellence by which pears are judged, this is a sugar pear and deserves its name.

Duchess---Often bears the first year after transplanting large greenish yellow, sure cropper, very profitable. It is one of the pears to which you can pin your faith.

Anjou---(Beurre de)---Delicious late fall pear very handsome and dependable, it has an enviable reputation with the handlers of winter fruits and it is always profitable.

Kieffer--.The pear for the millions east of the Rockies. At Winchester, it is an un-failing cropper and brings good money to the orchardists. House keepers prefer it of all others for baking and canning, and properly handled, can be carried to Christmas without storage.

CHERRIES—One and Two Years

We have heard of women who made \$19 from ONE cherry tree. It is hard to understand why more trees of this delicious fruit are not planted,—certainly if you are growing for the market, you have never seen the time when the demand did not far outstrip the supply of good fruit

Sours

Dyehouse---A very fine large cherry, of good quality, a full week ahead of Early Richmond.

Early Richmond---This is the famous old Virginia May cherry, red, sub-acid, very popular, but not so good a cherry as the Dyehouse.

May Duke---A fine, large, dark cherry, the the richest of the sub-acid cherries.

Montmorency---Rich red, large productive deserves by all odds its place at the head of the list.

Royal Duke --A grand cherry, well named, the favorite of orchardists in the Grand Valley, Colorado, for shipping and canning

English Morello---Dark red, pretty tart, but a good cherry .

Wragg---Very much like English Morello, bears young and is valuable.

Remer's Mortgage Lifter---A money maker for everyone and should be on every farm and garden, sour cherry, and early heavy bearer, small seeds

No 1. trees, 5 to 6 ft.....50 cents

No. 2 trees, 4 to 5ft.....40 “

3 to 4 ft.....30 “

Sweet cherries do not do well for us We grow a few for those that want them.

Wherever the Peach and Apple are grown
AULNE TREES are known and are in demand.

They are grown under the highest cultural conditions, no pains or money are spared to produce the highest type of tree to be found anywhere.

PEACH TREES

Listed in Order of Ripening

w, c.---white cling; w. f.--- white free.

y. c.---yellow cling; y. f.---yellow free

Alexander, w. c.---A good peach for home use

Greenboro w, c.—As the nigger said, “Now you’re talking,” “That is some peach.”

Arp Beauty y, f.---Hailed as the first good market peach of the yellow type,

Champion, w. f.---Hardy, delicious flavor, but not well colored, South.

Fitzgerald, y. f.—Another good yellow peach

Reeves' Favorite, y. f.—A first-class yellow peach.

Crawford's Early, y. f.---The greatest money maker of the west.

Capt. Ede, y. f.---Resembles Elberta, but in Illinois a better peach.

Belle of Georgia, w. f.---As valuable a white peach as the Elberta is for the yellow type. Splendid color, good quality, etc.

cellent shipper, it commands a better price than Elberta in some markets East.

AULNE CLING, ^{fr}~~fr~~ The best cling-stone ripening prior to Elberta.

(From Marion Record, August 25, 1912)

After awhile it will be said "and that is peach that made Aulne famous." For the peach to which we refer is certainly a peach of a peach. It is a peach which A. T. Remer has produced and which gives promise of establishing a great reputation. He brought the first basketful to town Monday—the first of the kind ever grown here or anywhere else, for it is a new variety which Mr. Remer has developed as a result of six years of selection. It is a large yellow cling-stone, perfect in shape and of good color and quality. The basketful brought in were the finest of any we have seen this season. They are as good or better lookers than the Elberta and of superior quality. Mr. Remer has not decided absolutely upon the name for them but thinks now that he will name them "Aulne." And that would be a mighty appropriate name. Besides the word itself is said to mean 'Alone' and in its class this new peach will likely stand alone for its quality among peaches grown in this part of the country.

For the above peach we do not claim it is the only good one grown, and that it will need no sugar to can it or that it has no fuzz or will not rot, or buds freeze, but if I know

any thing about peaches I say it is a good one and well worth planting. We have only a few trees and will put them out at

No. 1 trees 4 to 5 ft.....	40 cents
No. 2 trees 3 to 4 ft.....	30 "
2 to 3 ft.	20 "

Stump, w. f.---Another good peach, well known and in good demand.

Crawford's Late, y. f.—Fine for canning, this is the peach Cartis uses for his Blue Ribbon brand

Smock, (Beer's) y. f.—A Splendid yellow peach and good shipper.

Heath Cling, w. c.---Remember if you are growing peaches to sell that housekeepers require cling stones and the best of the entire list is the Heath Cling.

Salway, y. f.---Not a good peach on lowlands but fine for uplands and no peach has more sweetness, more imprisoned sunshine than the Salway, a good shipper and well colored up.

Henrietta.(Levy Late), y. f.---With the flavor of an apricot,

PLUMS

We grow only those varieties of plum that have made good,—our list comprises the most easily grown and fruited combined with productiveness and profit bringing

N. means Native; J. Japanese; D, Domes

tic or European,

Abundance, J—The most widely popular of the Japanese type, bright cherry red, flesh firm and sweet.

Burbank, J---This is a very large plum, mottled red and yellow, At Winchester, it is very productive and dependable.

Wild Goose, N---This is an old plum, large, bright red, very sweet and juicy, we grow from the Davis strain, which produces the largest fruit of the Wild Goose type that we have ever seen.

Lombard, D—East of the Rocky Mountains this is the best plum of the European type, violet red in color, quality extra fine,---tree hardy, vigorous and prolific.

Imperial Gage, D---Large, pale green, the standard of high quality in plums. We one time thought the Gages did not do well in the south, but we find that we are mistaken,-there are numbers of trees in Franklin County, producing fruit that is unexcelled in size, color and quality.

Grand Duke, D---We are growing this old plum this year for the first time in many seasons, but it is so fine and large and the fruit is bringing such good prices. we came to the conclusion we were behind the times and depriving our customers of a mighty good thing. Fruit is a dark

QUINCE

Champion—The first bearer and best, Its name describes it, in point of size and color, it is invaluable for cooking, marmalade and syrup, (the most delicate and delightful of all syrups.)

APRICOTS

The markets of the whole country cry yearly "Give me more apricots" and practically the entire output comes from just a few valleys on the Western Slope. Besides there is always a good local demand for the fruit, the dried product comes high at the Grocery store,—you can do it yourself, and secure just as satisfactory results.

Early May —Ripens early, fruit good size rich and juicy.

Superb---Very prolific, hardy and of excellent quality. Successfully grown in all commercial peach sections.

Royal---Large, mottled yellow and dark brown, very highly flavored and popular for drying and canning.

Moorpark—This is the great Western Cot, the kind they do up in paper and ship in boxes of 80 to 100 to the box,---It is a great money maker and we have a strain that used to walk away with the ribbons at the county fairs.

NUT TREES

American Sweet Chestnut---We have some well grown trees of this good old fashioned tree, which besides its value for nuts makes one of the handsomest of shade trees and ought to be included in every collection for lawn planting.

Butter Nuts, Chestnuts and some others.

GRAPES

The general utility fruit, grown on nearly all kinds of soils rarely fails to make a crop, and as one authority states the grape, "by chemical analysis and practical test, excels all other fruits in richness and healthfulness of food content.

Campbell's Early---Purple, resembles Concord but much larger, earlier and a remarkable keeper and shipper, Bunch and berry very large. Price 15 cents each.

Moore's Early---Similar to Concord also but larger. The vine is healthy, and the fruit is handsome well shouldered on the bunch there is a defined demand for this variety and you cannot go amiss in planting it, either for home use or market. 8 cts. ea.

Brighton---Red, delicious and sweet, vine a strong grower.

Vorden---Black, tested and tried,--a dependable and valuable grape.

Concord---Black, the grape that has made the money, does well everywhere, is healthy, hardy and productive. It is best of them all, for all purposes.

Ives Seedling---Black a good Sothern grape
Niagara---White, bunch large, fruit rich and melting. It is also a money maker and one authority says it is the greatest grape of all, that it is the White Concord.

Catawba---Red, an old favorite, Henry Clay had some Catawbas at his home in Kentucky home, of which he was very proud, he selected the finest bunches and sacked them himself, at the proper time, and it was a special proof of his high regard, when he sent a basket of Catawbas to a lady or gentleman. And by the way, the Catawba makes the most delicious grape juice.

In shade trees we have one of the most complete lines in the west, and I make Evergreens a specialty. I can safely say I have more Evergreens growing over the west than any other firm in the west.

IN CONCLUSION

Do not believe the agents when they tell you I have no goods, that kind of talk is their stock in trade and they have no conscience as to how they use it. Send in for prices on what you want.

Wishing you a prosperous year

Yours

A. T. REMER
